

GND

Adjusting Potentiometer

Voltage proportional to pump current  
Is set to 1210mV  
Increase to maximum of 1300mV  
You can test to decrease to 900mV

We measure 1225mV.  
We can increase to 1249mV **maximum**.  
Result : **no change**

We can decrease to 900mV.  
Result : **no change**
